2. Citations and explanations:

Claims 1-11, 15-20, 22-31 and 33 lack novelty under PCT Article 33(2) as being anticipated by Krasner.

Krasner teaches an acquisition aided mobile positioning receiver which acquires a first satellite signal and subsequently uses information measured with respect thereto to reduce the search time for a second satellite signal. The information derived from the first satellite is utilized to determine a time of arrival for a subsequent satellite. The step of determining a need to acquire is inherently met since the intended purpose is the desire to know position, thus, the need for acquisition is inherent.

Claims 15, 17, 18, 22-24, 26, 31 and 33 lack novelty under PCT Article 33(2) as being anticipated by Carter.

Claims 15, 17, 18, 22-24, 26, 31 and 33 lack novelty under PCT Article 33(2) as being anticipated by Underbrink.

Claims 1-38 lack novelty under PCT Article 33(2) as being anticipated by Soliman. Note: since the position estimate utilizes cell-ID info, it is inherent that a change in cell ID corresponds to a change in position.

Claims 1-38 lack novelty under PCT Article 33(2) as being anticipated by Bloebaum. Note: since the position estimate utilizes cell-ID info, it is inherent that a change in cell ID corresponds to a change in position.

Claims 1-38 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
